PORCELAIN PAVERS

12"x24"x3/4" ±, 24"x24"x3/4" ±

Porcelain Pavers are a more durable form of ceramic tile used for both indoor and outdoor flooring. The material used to manufacture them is generally dense. Stone Universe porcelain pavers are available in two different sizes - 24"x24"x3/4" (Squares) and 12"x24"x3/4" (Rectangles) and a wide range of colors.

SUI's porcelain paver range offers various styles to create fascinating outdoor surroundings. The 3/4" thick porcelain paver installation is durable which makes it an optimal choice for covering the Surface area. Stone Universe porcelain pavers which mimic the look of natural stones are taking precedence over other manufactured pavers among landscapers, contractors, builders, architects, and even homemakers.
